Peace of Mind with
X years warranty

Easy to Install and easy to service:

- 1) Removeable side covers to access pipe & condensate drain²
- 2) Left or right flexible connection of the condensate drain
- 3) Removable drain pan¹
- 4) Detachable fan motor's support
- 5) Large installation plate²
- 6) Ribbed inner surface to prevent risk of condensate leaks²
- 7) Enlarged suction area for better performance²
- 8) Easy-to-remove front cover (2-3 screws)
- 9) New cap on deflectors for durable opening/closing²

¹ Not available in small-size chassis of models RAK-DJ09PHAA and RAK-DJ12PHAA.
² Not available in the largest size chassis of RAK-DJ36PHAA

Cooling & Heating

airHome 400

Uncomplicated Comfort

Experience a **simple & elegant solution** for a serene living space with airHome 400. Designed for ease of use and **minimal environmental impact**, ensuring a hassle-free living.

Comfortable
all year round

AirHome 400 provides an ideal atmosphere in all rooms, with excellent cooling/heating capacity to keep you cozy in cold weather and cool in warm weather. For an added comfy environment, airhome helps remove humidity excess from your home by up to 3.3l/hour (**)

So quiet it dissapears into your home

With a **sound level from 29(***) dB(A)** in operation and without the disturbance of frequent on-off cycles.

Energy efficiency for lower running costs

Heat Pump Technology

Mini Splits work by using outdoor heat to warm homes in winter and moving out indoor heat in summer for improved use of energy

Disclaimer**The images provided have illustrative purposes and may not accurately represent the actual unit dimensions**

(**)Dehumidification capacity of RAK-DJPHAA/RAHA -RAC-DJWHAADJ models, may vary for other models.

(***)29dB(A) is the sound pressure level at silent mode of the following models: RAK-DJ09PHAA,RAK-DJ12PHAA,RAC-DJ09WHAA,RAC-DJ12WHAA. Higher capacity models have a higher sound level.

Peace of mind even in your sleep

Activate GoodSleep before bed, and after a set number of hours the fan speed will reduce for quieter operation and temperature will gently adjust for a placid sleep.

Eco Mode

Press the eco button for extra energy savings. It adjusts the set temperature to **reduce power consumption**.

Vector DC inverter technology

Embedded technology monitors and adjusts the compressor's rotational speed, **cooling with maximum capacity**, then automatically slowing down to optimal operating capacity to **maintain room temperature**. Saving **30% more energy** compared to regular compressor.

Non-Inverter

Inverter

Effortlessly improving the air quality in your home

FrostWash™ Self cleaning technology

In a **freeze and melt** process the **heat exchanger is cleaned** and the **impurities accumulated** over time are captured and eliminated.

99% Viruses
removal⁽¹⁾

99% Bacteria
removal⁽²⁾

95% Mold
removal⁽³⁾

3x better at maintaining air flow performance⁽⁴⁾

PM2.5 Active Carbon air purifying filter

Effectively **removes 99%** of small particles -as small as 2.5 um (micron)- after 4.5 hours, offering **anti-VOC properties**, and **deodorizing the room**, leaving the air fresh.

Also included:
Stainless pre-filter for extra cleanliness⁽⁵⁾

Hassle-free controls

New easy-to-use remote All features at the click of a button

- Indoor temperature management
- Fan speed
- Choice of mode (heating, cooling, etc.)
- Airflow direction
- Leave home: **maintains sufficient heating to prevent pipes from freezing when you're away in colder climates.**

*The mold guard function can prevent mold growth inside indoor unit but not remove existed mold.
** It can slightly vary depending on models and current temperature/humidity conditions.
*** The temperature of coil heating may differ depending on ambient and indoor conditions.
(5) Combination of Stainless steel pre-filter PM2.5 Active Carbon air purifying filter tested at Johnson Controls-Hitachi Tochigi factory, Japan. Test Method : JEM1467 (The Japan Electrical Manufacturers' Association). Test was done under continuous cooling operation at high fan speed of RAS-VJ24CLT in a room with size of 25m³ and 25°C for 300 minutes. (6) Adapter should be bought separately.

Mold Guard*

Prevents mold growth and **unpleasant odors** by automatically forcing air for approximately **60 min(**)** through internal components and heating the coil to **122°F(***)** after every turnoff.

Built to last for a worry- free future

- Anti-Rust Painted Outdoor Casing
- 3-Minute Delay Circuit (Fuse Blow Prevention)
- Wide voltage range
- Fireproof Electrical Enclosure
- Standard Anti-Corrosion Colored Fin
- **Snow-hood accessory available**

More ways to control your ac:

airCloud GO

- Manage your AC from **your phone**
- Gain control over your bills with **Energy Cost estimator**

- Weekly program your ac based on **your routines**
- Enables voice command by **Amazon Alexa & Google Home**
- **Wifi Adapter** invisible installation inside the unit.

SPX-WFG03
(optional)⁽⁶⁾

airPoint Room H700

SPX-URFG1
(optional)

- Complete controls by **wall-mount thermostat**
- Colored screen and **intuitive visualization**
- Include a power **monitoring features**

(1)(2)(3) Tested by Kitasato Research Center of Environmental Science. Test No. 2020_0650. Test model: RAS-X22K Reduction effects of virus, bacteria and mold were observed by operating FroshWash™ once. (4) 2 identical units were tested for comparison; with and without FrostWash. Test chamber simulated approx. 2 years of dust and oil build up which may be experienced in a typical home environment. Airflow performance was tested before and after being in the chamber. Unit without FrostWash experienced an 18% drop in airflow performance. Unit with FrostWash experienced only 6% performance drop. Tested at Johnson Controls-Hitachi Tochigi factory, Japan.
